

WEDNESDAY, FEBRUARY 25 – TECHNICAL TOUR AGENDA

14h00 : Departure from ENSAM

15h00 : Arrival at S2A

15h15 : Start of the visit

16h00 : End of visit

16h15 : Arrival at IAT

17h00 : End of visit

17h15 : Departure from IAT

17h20 : Stop at Gare de Saint Quentin (RER C or TRAIN N to Montparnasse train station)

18h15 : Arrival at ENSAM

Visit of the GIE S2A and the Institut Aerotechnique (IAT)

2 avenue Volta 78180 Montigny le Bretonneux

15 rue Marat 78210 Saint Cyr l'Ecole

- Created in 2001 by PSA Peugeot Citroen, Renault and the Conservatoire National des Arts et Métier, operational since 2003, GIE S2A provide all of the automotive industry with testing means in aerodynamic and aeroacoustic.
GIE S2A federate the expertise center in aerodynamic and aeroacoustic French automotive. The skills and know-how are beyond the strict scope of the automotive industry and are opened to other industrial sectors: aeronautic, wind energy, including construction.

- The IAT is a public institute and has been inaugurated in 1911 with the aim of supporting the beginnings of aeronautics through research. Numerous testing facilities have been developed there since. Nowadays, the IAT performs tests and research in aerodynamics and related sciences, using four industrial wind-tunnels, for companies and laboratories in various fields like aeronautics, road, railway and maritime transports, wind energy, building and civil engineering or sports.
